PROFESSIONAL SUMMARY

B.Tech Computer Science & Engineering student with hands-on experience in backend and full-stack development using Java, Node.js, Express.js, React.js, MongoDB, MySQL, and REST APIs. Experienced in building production-oriented applications involving authentication, database management, AI/GenAI integrations, and role-based systems. Strong foundation in DSA, OOP, DBMS, Operating Systems, and Computer Networks.

TECHNICAL SKILLS

Programming Languages:	C++ C Java Python JavaScript TypeScript SQL
Core Computer Science:	DSA OOP DBMS Operating Systems Computer Networks Software Engineering
Backend :	Spring Boot Node.js Express.js Flask FastAPI REST APIs RAG JWT Authentication
Frontend Development:	React.js HTML CSS Tailwind CSS Next.js
Databases:	MongoDB MongoDB Atlas MySQL
AI/ML & Generative AI:	Scikit-learn NumPy Pandas Gemini API AI Application Development API Integration
Cloud & DevOps:	AWS EC2 S3 IAM Basics Docker GitHub Actions Vercel Render

EXPERIENCES/INTERNSHIPS

AI/ML Virtual Intern | Infosys Springboard | Aug 2026 – Present

- Working on an AI-Driven Product Assistant project focused on customer feedback analysis, product planning, and requirements generation.

Full Stack Developer Intern | Bireena Infotech | April 2026 – July 2026

- Developed a full-stack hospital management system covering patient records, appointment management, billing, and authentication, with REST APIs for real-time data management.

Web Development Intern | Yashi IT Services | Aug 2025 – Sept 2025

- Developed responsive websites using HTML, CSS, JavaScript & Tailwind CSS, while customizing Shopify and WordPress themes, plugins, and layouts.

Cisco Virtual Internship – Cybersecurity & Networking & Artificial Intelligence| 2024, 2025 & 2026

PROJECTS

CodeForCareer — Full-Stack Placement & Coding Platform | [GitHub](#) | [Live Demo](#)

- Developed a full-stack placement preparation and coding platform with coding practice, quizzes, learning resources, and career development features, using React.js, Node.js, Express.js, and MongoDB.
- Implemented AI-powered ATS Resume Analysis using Gemini API, online code execution through Piston API, and secure JWT authentication with protected routes.

Product Intelligence Platform — AI-Powered Product Analytics | [GitHub](#) | [Live Demo](#)

- Building an AI-powered platform to analyze customer feedback using classification, sentiment analysis, embeddings, clustering, trend analysis, and prioritization.
- Implemented AI agents with Gemini and RAG-based retrieval to transform analyzed customer feedback into product insights, prioritized features, PRDs, roadmap recommendations, and reports.

LearnWise AI — GenAI-Powered Adaptive Learning & Career Mentor | [GitHub](#) | [Live Demo](#)

- Developed a GenAI-powered adaptive learning platform using Google Gemini to generate personalized learning roadmaps, diagnostic assessments, remediation plans, career simulations, and AI-assisted resume analysis.
- Built the platform backend using Node.js, Express.js, Mongoose, JWT authentication, REST APIs, and MongoDB Atlas, with a React-based dashboard for learning paths, assessments, career insights, and AI mentoring.

NetSage AI — AI-Assisted Network Troubleshooting Application | [GitHub](#) | [Live Demo](#)

- Developed an AI-assisted network troubleshooting application using Python, FastAPI, React, and Google Gemini, combining deterministic rules with AI-generated diagnoses based on symptoms, topology, device data, and command-output evidence.
- Built REST APIs and a React dashboard for cases, diagnoses, and human reviews, generating structured reports with root cause, confidence, OSI layer, evidence, and recommended commands.

Bireena Medico — Hospital Management System | [GitHub](#) | [Live Demo](#)

- Developing a multi-role hospital management and clinic ERP system covering patients, appointments, EMR, prescriptions, laboratory, pharmacy, billing, reports, and analytics using React.js, Node.js, Express.js, and MongoDB.
- Developing REST APIs with JWT authentication and role-based access control, along with responsive React dashboards and workflows for clinical and administrative operations.
